RE: Docket No. 99N-1393: Agency Information Collection Activities:
Proposed Collection; Comment Request; State Petitions for Exemption
from Preemption

We would like to take this opportunity to submit comments in response to the Food and Drug Administration's (FDA) recent notice, "Agency Information Collection Activities: Proposed Collection; Comment Request; State Petitions for Exemption from Preemption" (64 *Federal Register* 30037; June 4, 1999). Specifically, the Agency is requesting comments on the extension of reporting requirements contained in existing FDA regulations governing State petitions for exemption from Federal preemption, i.e., 21 CFR 100.1(d). The International Jelly & Preserve Association (IJPA) is a national trade association representing the manufacturers of jellies, jams, and preserves, and nonstandardized fruit spreads, and the suppliers of goods and services to the industry, including ingredient suppliers of fruit, sweeteners and pectin. IJPA actively supports national uniformity, especially with respect to food labeling and standards of identity.

Section 403A of the Federal Food, Drug and Cosmetic Act (the Act) was enacted to maintain national uniformity. IJPA supports the national uniformity intent of this section of the Act. However, under Section 403A(b) of the Act, States may petition FDA for exemption from Federal preemption of State food labeling and standard of identity requirements, and section 100.1(d) sets forth stringent requirements to be included in such a petition. IJPA believes these requirements are necessary as it is important that any deviation from national uniformity be supported by strong and factual documentation. This will allow FDA to determine if the State's request complies with the statutory criteria for exemption from Federal preemption. IJPA, therefore, supports retaining these requirements as an important part of implementing section 403A of the Act.

We noted with interest the Agency stated that few State exemption petitions for labeling requirements have been submitted. According to the notice, FDA has not received any exemption from preemption petitions over the past three years, and only eight such petitions have been received since enactment of section 403A of the Act as part of the Nutrition Labeling and Education Act of 1990. It is evident from the lack of petitions that the regulation and related statute are accomplishing the Congressional intent of maintaining national uniformity. Accordingly, there is no need to modify the current regulation, especially with respect to reporting requirements.

In conclusion, IJPA strongly supports national uniformity and the maintenance of current regulations governing State petitions for exemption from preemption.

We appreciate the opportunity to submit these comments.

Respectfully Submitted,

A handwritten signature in black ink that reads "Pamela A Chumley". The signature is written in a cursive style with a large, sweeping initial "P".
